

OUR MISSION

Our mission is to make high-quality sleep disorders testing, treatment, and monitoring for success more accessible, sustainable, and easier to deliver.

ABOUT US

NightWatch Sleep, specializes in assisting healthcare facilities use existing resources to establish programs for the diagnosis and treatment of sleep disorders. We bring all aspects of sleep disorders management including OmniPro, our proprietary no cost data collection and processing hardware and software. The system is capable of attended Polysomnography (PSG) and Electroencephalography (EEG). We also provided free patient screening to identify candidates for sleep testing, Home Sleep Apnea Testing (HSAT), and electronic compliance monitoring to optimize treatment outcomes. For those facilities already operating sleep testing programs, we offer PSG scoring and interpretation along with EEG interpretation.

BENEFITS

LOW COST

- The underlying theme for the business model is to create a turnkey operation at a very low cost – ***everybody wins***

NO STARTUP COSTS

- Use a standard patient room
